Review of AAR:

at would report that the events
happening - 15:20 mins later Sir Am
would say unknowns also.

No doubt it
was authentic

Shout down;

I presumed VP in com w/ Phil
No procedures

They would depart
ad op center in SVTS -
this is after -

Session leaders would depart ad center in SVTS.
Send a reminder to ask Q.

diff things pop up periodically.
we would have to send a
reminder in.

Send what info getting in SVTS

bring P in conference - no coord
from SIOP level.

I don't know whether they also had access in SVTS
to what was going on in Conference

With Sir Am: just observations - good on bad.

A.
Col John Brunderman USAF 5/17/04

Val ran all the Comms

Dec 2000 first after Air War College
SIOP Advisor
resp for training on nuclear options

He was in EA cell working on play
sheet for exercise

Chuck said something hit WTC, saw
smoke on TV → explosion, accident

Understand is first [2000] began
~~doing~~ notification for anti terrorist
cells — J34 deals w FPAT

— J33 J3, not sure
— after first strike no confirmation
to begin not for possibility
of a terrorist attack
poss of explosion was small

— he was still in EA cell when
it one hit — they watched it
that changed the focus to "US
is under attack." began to
respond accordingly

0846-0903

? Calls to FAA — wasn't aware
his focus was internal military

Pat G is at the center of the spider
web — went to NMCC as SIEC
was building

EA cell — discussions about SIEC
Pete & Sgt H were customizing the
list — have to build before
execute

after second — decision to go
to air threat — he went
to DDO Sheikh arguing we were
under an attack

There are consequences — it is
a fully classified conference
but can't be tailored

Capt L was still on duty

Back to discussion on what conference
it was DDO/ADDO call
Pat said, yes but
Needed to customize anyway

Presumed from
talking to NORAD in between, found
out there were up to 5 hijacks going
~~Concern for other agencies~~ That's
when he
advocated
an attack

Chambers should have been
communicating w/ NORAD and
have been able to

Doesn't recall if anyone called FAA
Pat may have told Repn to
do so

He was shown the integrated chronology
& Ryans chronology

- 1250Z entry re UAF from NORAD
Chronology - Source

- They were building SIEC so they
waited until it was up before
they transitioned

Defman Red Switched Net Auto
STU III in sets the level Crypto
& precludes others from
coming in

There was nothing even close to
what became the DEW

Prebuilt for An Threat

SIEC not so - some are

for NMCC they go to Command Centers & don't control who they bring in

Discovered comm issues well after 9/11 when they were building DED & trying to figure out what they were having problems

Transition from SIEC to Threat elevates the level of participation

He thought that when conferences come up there were multiple hijacks

"Injects" were not what you have wheel

[circular reporting]

In DDO Shack

remembers clearly being w/ Winfield but also remembers being w/ Laidig
